ASSIGNMENT NO. 1

Metamask Installation

Metamask is a popular Ethereum wallet and browser extension that allows you to manage Ethereum and Ethereum-based assets (such as ERC-20 tokens) and interact with decentralized applications (DApps) directly from your web browser. To use Metamask and study spending Ether per transaction, you can follow these steps:

Install Metamask:

a. Open your web browser (Metamask is available as an extension for Chrome, Firefox, Edge, and Brave).

b. Go to the Metamask website: https://metamask.io/

c. Click the "Download" button and follow the installation instructions for your browser.
